Re: Telephone Contact 8/27/92

Dear Ms. Smith:

This correspondence is to document the verbal agreement of relocating the Mercury Solids waste pile sample to the south of the point identified in the Olin Sampling and Analytical Plan for Phase III. In relocating this sample point it will avoid the restrictions of a 2.5 foot thick concrete pad and be downgradient of any contaminant movement from the area.

Sincerely,

Marie (Toni) B. Odom
